In the Matter of:)
)
Teleguam Holdings, LLC (“GTA”))
USAC CERTIFICATION)

GTA Docket 16-04

PUC LEGAL COUNSEL REPORT

BACKGROUND

On September 14, 2016, Teleguam Holdings LLC (“GTA”) filed its 2016 Annual USAC filing. It petitioned the PUC to issue a Certification that GTA will use federal universal service support funds for purposes in compliance with Section 254(e) of the Communications Act.¹ GTA receives monies from interstate universal service funds [“USF”] that are designated to support local services, build needed infrastructure and improve service quality.

Each year the PUC is required to certify to the FCC and the Universal Service Administrative Company (USAC) that those funds will be used only for the purposes designated in the federal Act.² Absent such a Certification by PUC, GTA, as an “Eligible Telecommunications Carrier” (“ETC”), would be denied funds for each quarter of the year that certification is delayed.

GTA’s Petition states that universal support funds received by it are all being used to support core services that are designated for USF support.³ The Executive Vice President- Legal & Regulatory has certified that all federal high-cost support received will be used only for the provision, maintenance, and upgrading of facilities and services for which support is intended.⁴

All USF funds received are used to support core services.⁵ GTA indicates that the cost of providing these core services is covered by federal USF support as intended by the federal USF programs.⁶

On March 17, 2005, the FCC released its ETC (“Eligible Telecommunications Carrier”) Designation Order, which adopted specific requirements for ETCs granted designation

pursuant to Section 214(e)(6) of the Federal Act.⁷ The FCC designated nine core services that are eligible for Universal Service Fund (USF) support: single party service; local usage; voice grade access to the public switched telephone network; dual tone multifrequency signaling; access to emergency services; access to operator services; access to interexchange services, access to directory assistance; and toll limitation service for qualifying low-income consumers.⁸

COMPLIANCE WITH FCC AND ETC DESIGNATION ORDER REQUIREMENTS

In its Petition, GTA certifies that, in accordance with 47 C.F.R. §54.101, GTA provides all of the core services that are designated for USF support. It offered all of the services designated by the FCC for support pursuant to Section 254 (c) of the Federal Act during calendar year 2015 and to date in 2016.⁹ It provides those services as part of its basic residential and business local line service under its General Exchange Tariff approved by the PUC.¹⁰ Through GTA's tariff, its customers are able to purchase single party, unlimited local usage telephone services that utilize dual tone multifrequency signaling. In addition, GTA provides access to 911 as well as access to operator services, directory assistance and access to interexchange services. It provides toll limitation for domestic and international toll calls.¹¹

GTA has submitted information to demonstrate that it is in compliance with the FCC requirements of the ETC Designation Order:

1. Progress report on the ETC's five-year Service Quality Improvement Plan. The Federal Communications Commission requires ETCs to submit a five-year build-out plan in a manner consistent with Section 54.202(a)(1)(c) of the Commission's Rules by July 1, 2014 and to submit annual progress reports thereafter.¹² Section 54.202(a)(1)(ii) requires the ETCs to submit a

five-year plan that describes with specificity proposed improvements or upgrades to the ETC's network throughout its proposed service area, including an estimate of the area and population that will be served as a result of the improvements.¹³

In particular, the FCC March 5, 2013 Order specified that, for rate-of-return carriers [i.e. "GTA"], the five-year plans "should describe the carrier's network improvement plan, which should provide greater visibility into current plans to extend broadband service to unserved locations in rate-of-return service territories."¹⁴ The FCC has indicated that a key component of the certification issued by entities such as the Guam PUC under Section 254(e) is whether USF support is being used to maintain and extend modern networks capable of providing voice and broadband service.¹⁵

The FCC's five-year plan requirements require the ETC to describe with "specificity" the proposed improvements or upgrades to the ETC's network throughout its service area: (1) how signal quality, coverage, or capacity will improve due to the receipt of high-cost support throughout the area for which the ETC seeks designation; (2) the projected start date and completion date for each improvement and the estimated amount of investment for each project that is funded by high-cost support; (3) the specific geographic areas where the improvements will be made; and (4) the estimated population that will be served as a result of the improvements.¹⁶

GTA has submitted its Five-Year Service Quality Improvement Plan as an Attachment to its Petition.¹⁷ The Plan, and Exhibits A and B thereto, actually set forth GTA's major network improvement projects for the six calendar years 2015 through 2020, along with the start and completion dates, capital costs, and areas and populations associated with those projects.¹⁸

¹³ 47 C.F.R. §54.202(a)(1)(ii).

¹⁷ GTA Five-Year Service Quality Improvement Plan, GTA Docket 16-04, filed September 14, 2016 [attached to GTA Petition].

¹⁸ *Id.* at Exhibit A--Five Year Build Out Plan.

GTA asserts that its use of funds for these projects will enhance its network and invest in new technology.¹⁹ Numerous projects are listed including: additional DSLAM Construction; installation of VDSL; upgrade of the fiber core network; Copper Remediation and Update; Fiber Remediation & Capacity Upgrade; wire line integration; capacity enhancement; and ongoing cable maintenance and upgrades.²⁰ GTA has also indicated a breakdown of the estimated capital expenditures associated with the projects and operating expenses.²¹

Submitted with its Five-Year Build-Out Plan are certifications by Teleguam Holdings LLC that it complies with applicable service quality standards and Consumer Protection Rules, and that it is able to function in emergency situations.²²

2. Detailed information on any outage lasting at least 30 minutes. GTA had zero outages that affected the landline and wireless service.²³
3. The number of requests for service from potential customers that were unfulfilled for the past year. There were no requests for service from potential customers that were unfulfilled for the past year.²⁴
4. The number of complaints per 1,000 handsets or lines. During calendar year 2015 and to date 2016, GTA was not aware of any end user complaints filed with the PUC or any other regulatory body.²⁵
5. Certification that the ETC is complying with applicable service quality standards. GTA certifies that it adheres to all applicable PUC service quality standards.²⁶
6. Certification that ETC is able to function in emergency situations. GTA certifies that it has the ability to remain functional in emergency situations. Through the use of its backup electricity generators, buried copper and fiber plant, and backup battery power at its central offices,

GTA has the necessary infrastructure and equipment to remain functional in situations that include fires, earthquakes or typhoons.²⁷

7. Certification that the ETC is offering a local usage plan that is comparable to the incumbent LEC. GTA is the incumbent LEC and offers an unlimited local usage plan to its subscribers.²⁸
8. Certification that the carrier acknowledges that the Commission may require it to provide equal access. GTA currently offers equal access to all of its subscribers and therefore is in compliance with this requirement.²⁹

GTA has also provided the required certification that it has advertised the availability of the supported services and charges through advertising, internet, and general media distribution.³⁰

GTA indicates that, for calendar year 2015, it received \$6,561,408.00 in USF.³¹ For the 2016 calendar year to date, GTA received a total of \$4,002,690.00 in high cost universal service support.³² GTA has also submitted audited financial data for 2015 as an attachment to its Petition to demonstrate that all funds are being used to support core services.³³ Based upon the Petition and supporting exhibits submitted by GTA, it appears that the USF received in calendar year 2015 has been used as intended. Counsel is not aware of any evidence which contradicts the above certifications by GTA and believes that such certifications should be accepted. It is Legal Counsel's recommendation that GTA's request for USAC Certification be granted. The Commission may reasonably certify that future USF received by GTA will be appropriately used. A draft letter to the FCC approving Teleguam Holdings LLC "Use" certification is submitted herewith.

Dated this 16th day of September, 2016.

Guam Public Utilities Commission

**To: Marlene H. Dortch
Office of the Secretary
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554**

**Irene M. Flannery
Vice-President – High Cost & Low Income Division
Universal Service Administration Company
2000 L Street, N.W. Suite 200
Washington, DC 20036**

**RE: CC Docket 96-45/WC Docket No. 10-90 –Annual State-Certification of
Support for Eligible Telecommunications Carriers Pursuant to 47 C.F.R.
§54.314**

Pursuant to the requirements of 47 C.F.R §54.314, the Guam Public Utilities Commission hereby certifies to the Federal Communications Commission and the Universal Service Administrative Company that Teleguam Holdings, LLC, is eligible to receive federal high-cost support for the program years cited.

The Guam Public Utilities Commission certifies for Teleguam Holdings, LLC, that all federal high cost support provided to such carrier within Guam was used in the preceding calendar year (2015) and will be used in the coming calendar year (2017) only for the provisioning, maintenance and upgrading of facilities and services for which the support is intended, consistent with Section 254(e) of the Communications Act.

I am authorized to make this certification on behalf of the Guam Public Utilities Commission. This certification is for study area 663800 for the Territory of Guam.

Dated this 29th day of September, 2016.

Jeffrey C. Johnson
Chairman
Guam Public Utilities Commission
